Let's Make Kentucky an Abortion-free State

November 13, 2017

Dear Friend,

After nearly two decades of conservatives trying to pass pro-life bills in Kentucky, we now have pro-life legislation that will help to save the most defenseless—those in the womb, at least at 20 weeks or beyond.

We are grateful and give God the glory for everything accomplished in the pro-life movement over the years. With this said, one of our next projects will be to **create a pro-life documentary** featuring Kentucky's pro-life journey and achievements.

God has given us vision in the past with respect to the pro-life movement. We trust God will continue to guide AFA as we create a professional documentary for the pro-life cause. We have the blueprint and ideas, so now we are ready to raise support for this worthy cause!

Over the years, AFA has created several DVDs to help proclaim God's truth in the culture war of life vs. death. Nevertheless, partly due to limitations and breakdown of our current equipment, we have several needs for accomplishing this documentary:

- New **DVD label printer**
- **Professional label printing** for DVD cases
- One or two **Canon Rebel T6 Cameras**, camera **bags/batteries**, and new **SD cards** for high quality video shooting and recording
- **Musical soundtracks licensing** or creation of musical soundtracks for the **intro, credits and or interviews**
- **Shotgun microphone or portable digital audio recorder** for quality audio interviews
- **Funding** for **video editing** and **interviewer**

Our goal for this documentary is to include several interviews of pro-life leaders all across our state. These interviews include pro-life leaders in the African American community, the medical profession, state-level elected officials, and people who have had various key roles instrumental to passing Kentucky's recent pro-life legislation.

We will also highlight past and recent successes of Kentucky's pro-life movement and show the compassionate side of pro-life leaders (rarely covered). We also believe it is important to bring to attention some key facts on abortion, including its ill prevalence in society.

AFA of Kentucky, with its vital role in the pro-life movement, rejoiced in the recent 2017 legislative victories such as SB5, which made abortion illegal after 20-weeks' gestation (because the baby feels pain). With God's guidance, Kentucky could potentially lead America to end

-OVER-

abortion-on-demand. State legislators already have plans to introduce legislation that will potentially create an abortion-free state. For example, Rep. Dan Johnson of Mount Washington recently pre-filed the Abolition of Abortion in Kentucky Act (BR 143).

I am convinced, more than ever, of the need to continue the fight to protect the innocent in the womb. We **are** the **voice for the voiceless**. Any amount you are able to give will help move AFA of Kentucky forward in the creation of our new documentary.

We still have available free copies of pro-life DVDs on abortion attempt survivors Melissa Ohden and Gianna Jessen. We also have a recent DVD that includes pro-life leader Angela Minter’s testimony. If you would like any of these, please let us know on the return form below.

God bless you! With your help, we will continue to accomplish great things in Kentucky!

Sincerely,

Frank G Simon, M.D.
Director, American Family Association of KY
